discussed nucleotides as a code			
used models to explore cellular mechanisms			
made connections between models and concepts			
analyzed change in nucleotide sequences			
constructed explanations to communicate relationships among transcription, translation, the nature of the genetic code & gene, protein and trait			
other

### More Detail on the Discussions and Presentations (components 1 and 6)

Use the tables below to take stock of the discussion components in more detail.

Evaluate the **Discussion** aspects as *often, moderate, or almost never* in frequency.
